

# Life-Changing Results Without Medications

Dear Dr. Witkowski,

I hope all is well with you. I was just sitting here thinking about how grateful I am for you and thought I would let you know.

First of all, I want to give you an update on my beautiful daughter Gabriella who is now excelling in her third year of college at the University of Utah. She loves school and she loves learning, which is a far cry from that six-year-old girl that couldn't pay attention for five minutes, when I was lucky enough to be introduced to you!

I don't know if you remember, but she failed kindergarten because of her attention issues. The progress you made with her in 13 weeks was unbelievable and as you said we've never looked back. Yes, I do recall what a skeptic I was.

Today, I'm also grateful for what you did for me after my brain tumor and brain surgery a few years ago. As you will remember, after having a 14-hour brain surgery to remove that tumor, I experienced tremendous brain fog. I literally used to tell people I needed a legal pad to count to 10. I was struggling just to do the basics in my work. Then I remembered you and I called you, and nine weeks later my brain snapped back into excellent form.

I can clearly say that three years post-operation and at 65 years old, my brain is as sharp as it's ever been. Your work is magic. And you are a blessing to so many — thank you for impacting the quality of my life and my daughter's life and those around us.

Much love and respect,  
Christopher Andreoli
