

Life-Changing Results Without Medications

I wanted to take a moment to tell you what a powerful experience I had working with you last fall and this winter as I was recovering from a serious neurological inflammatory process that incapacitated me for a number of months.

My work together with you, even using Zoom online at a distance, was just as impactful in my own recovery as the work you did in person with my husband, David, six years ago as he recovered from a traumatic brain injury.

Dr. Witkowski, David and I know from our own experience that you are a true “healer” in the best sense of the word. We are both deeply grateful that, with your unique approach, you were able to help each of us return to neurological balance and full vibrant health — and with David at age 83 and me at age 77, that’s a true gift.

We both send you our fond regards and best wishes.

With much gratitude and appreciation,
Juanita Brown
